

Crypkey Power*Suite License Authorization

You may want to further evaluate the Applications so you may wish to extend the license. Follow these instructions to generate a site code which will allow you to get an extension. Once you have activated the **License Configuration Window** it is imperative that it **remains open** as sometimes the Site Code changes and the site key we generate will no longer be valid.

Click on the  button on the toolbar and click on **All Programs** and select **POWER*SUITE_2016**. Then, select **Utilities** and click on the  selection. In **Windows 8** you can **press** the **Windows key** on the **keypad** and **type License Configuration** into the search bar and then **select** the **License Configuration** to activate the application. This will activate the Select License file window.

1. Click on the **pgeology.lic** file name in the **PowerSuite_2016** folder and then click on the  button in the **Select License File** window to proceed.
2. Acknowledge both the subsequent error message and the contact message by **clicking** on the  buttons. This will now activate the **License Configuration 2016** window which will default to the Authorization Tab.

3. Click on the  button within the window.
4. This will activate a System message stating “*Site Code generation may take a few minutes. Do you wish to continue?*” Click on the  button.
5. The *Site Code* will be generated and can then be displayed in the *Site Code* field. This number can be written down, copied and pasted and sent to Trivision Geosystems via phone at 1+ 403-777-9454, or email at info@powerlogger.com .
6. Trivision will generate a *Site Key*. This number will have coded within it the number of days the program will be activated for and which modules you wish to purchase or evaluate. Type or copy and paste from the email the site key number within the *Site Key* Field.
7. Click on the  button. If successful you will get a message indicating so.
