

Version 11 Patch Download and Installation Procedures

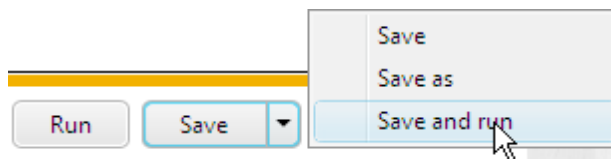

- 1.) Go to our downloads page www.powerlogger.com/downloads.asp. and scroll down to the bottom. In the Older Version of Power*Suite Section **Click** on the **2015/ V12 / V11**. This will jump you to our Older Versions download Page.

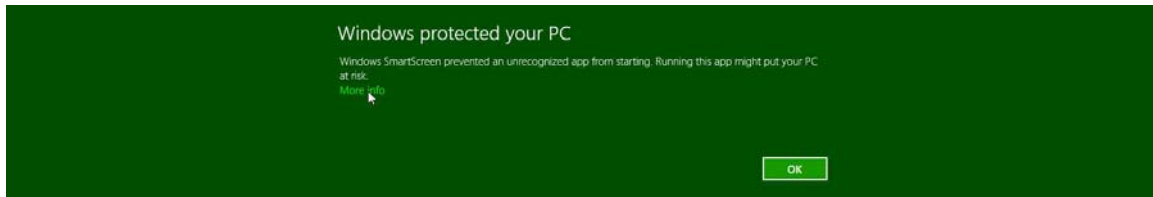

- 2.) **Click** on the Current Update Patch **V11** selection. This will activate the download file **PowerSuite_Update_V11.msi**.

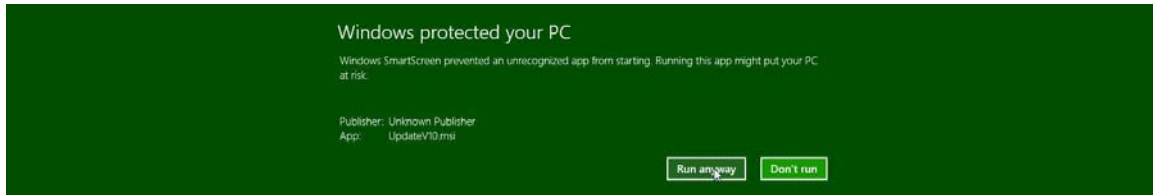

- 3.) **Click** on the **Down Arrow** beside the **Save** button and click on Save and run and this will more than likely save the file to your downloads folder.

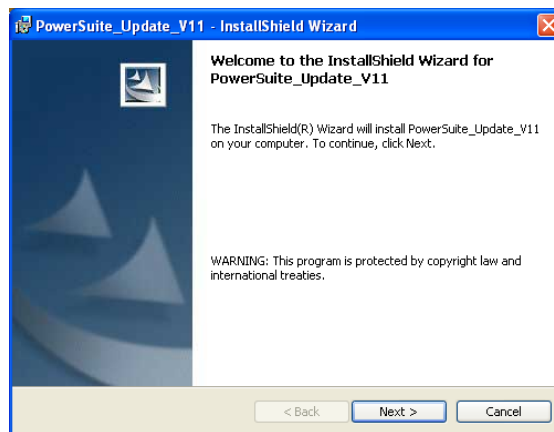

- 4.) Once the file has been downloaded you may get a message indicating that this file may be harmful and you will see a more info selection. **Click** on the **More Info Selection**

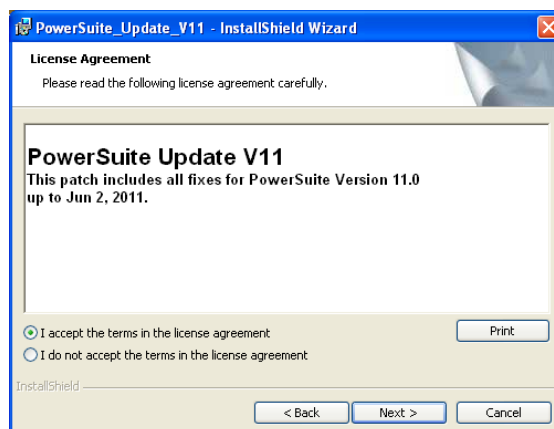

- 5.) **Click** on **Run Anyway**.

- 6.) This will activate the **Power*Suite Update Welcome Message Window**. **Click** on the **Next >** button.

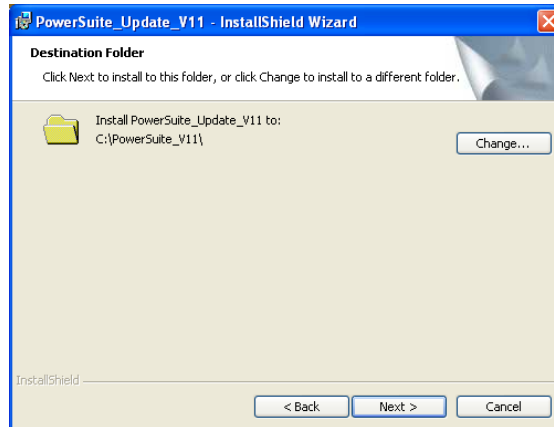

- 7.) This will activate the **License Agreement** window. **Click** on the radio button  beside **I accept the license agreement** and then **Click** on the **Next >** button.

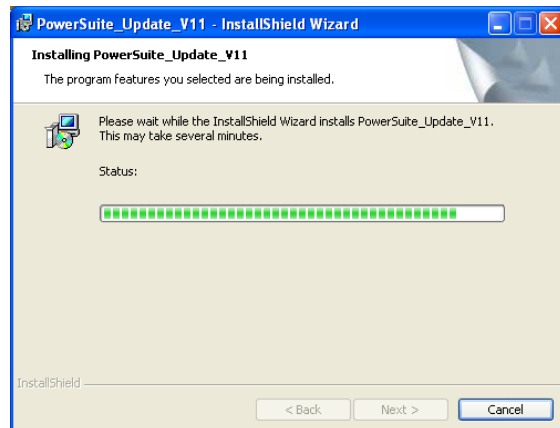

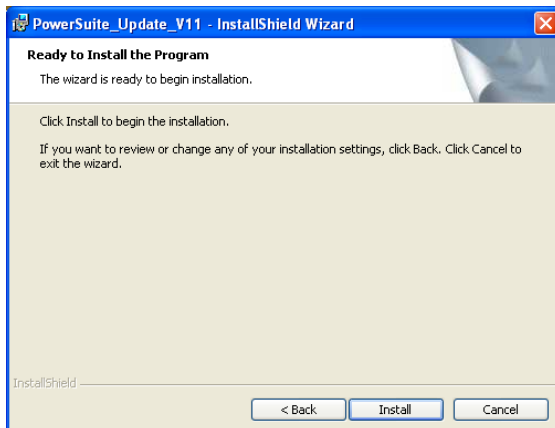

- 8.) This will activate the **Destination Folder** window with **C:\POWERSUITE_V11** as the default location. Click on the **Next >** button.

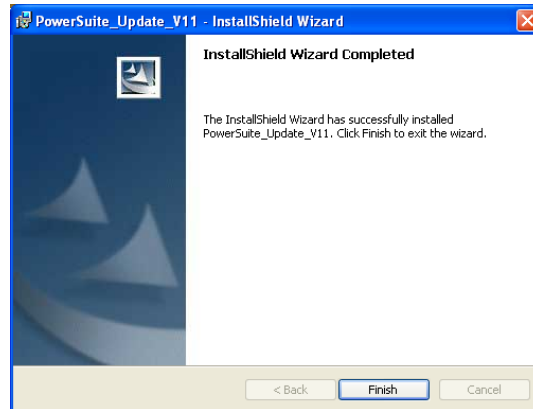

The User has the ability to change the destination folder if required by clicking on the **Change...** button. This all depends on where the original Power*Suite was installed.

- 9.) This will activate the **Ready to Install the Program** window. Click on the **Install** button. Next the user will see the **Installing Power*Suite Update window** copying files, removing backup files etc. An example of this window can be seen below

- 10.) Once the Update Installation is complete the **Install Wizard Completed** window shown below will be activated. **Click on the  buttons for the Update and the Main install.**

You will now have successfully installed the Power*Suite Update for V11.
