

# THE POWER\*LOGGER

Volume 1, Issue 2

TRIVISION GEOSYSTEMS LTD.

May 1999

## IT'S HERE! VERSION 1.92B

In keeping with our promise of constant improvements to our software, on March 26<sup>th</sup> we officially released Power\*Suite 1.92B. This release is the final maintenance release for version 1.92. It contains the latest versions of Power\*Log and Power\*Curve and is our most powerful and user friendly version yet.

Version 1.92B utilizes a new authorization system that allows you to transfer your authorization to any floppy disk. We have also incorporated metafile-printing technology to give you the ability to print to any printer quickly and easily. As well, look for revised annotation windows and some of the following improvements:

- **Well End and Morning Reports** have been modified to not show print dates on the lower left portion of the print.
- **Date Checking** means the program now checks to see if the hours and minutes fall within the standard 24-hour clock time system.
- **Legends** now incorporate the new symbology added to Version 1.92 with both Lithic Rock Fragments and Slickensides.
- **Title Pages / Legend / Formation Tops** have been resized to print on all printable areas of all printers. As well, the metes and bounds co-ordinates are now left justified.
- **Logarithmic Curve Plots (Power\*Curve)** now plot correctly when a value of zero is entered.
- **LAS Export Module** now shows the depth units in meters instead of feet so our LAS import module is capable of importing the LAS file into the system.
- **Layers Organizer** has been improved to allow you to save Layer Configuration after using the Hide All function.

So how do you get version 1.92B? If you currently have version 1.92, you can download the upgrade for **free from our website**. It is also available in our office on CD or floppy disk for \$25. If you would like it mailed to you, the cost will be \$25 plus postage rates. As always, we would be happy to install version 1.92B for you here in our office for \$50 or anywhere in Calgary for \$100. To make an appointment to get your upgrade, please call our office at (403) 777-9454.

For our users with older versions of our software we are offering the 1.92B upgrade at fantastic prices to thank you for your business. For users with version 1.90 or 1.91, the upgrade to 1.92B will be **\$599** – a savings of **almost 70% off** the regular price. If you are using versions older than 1.90, we are offering the upgrade at **\$799** – **over 50% off** the regular price. These special prices are in effect until **May 31, 1999**, so **get yours now!**

## ASCII TO LAS

Our new **ASCII to LAS file builder** is now ready for purchase. This utility takes any ASCII file and turns it into an LAS file. Regardless of the ASCII file content (text, numbers, or digital data) or the order of the columns, the builder creates an LAS file for you. This will enable our LAS import module to import any ASCII file from any source. You no longer need to know any spreadsheet programs to edit the columns or manipulate the data; it's all done for you. For more information, visit our website and try the 10-day free trial or contact our office at 777-9454.

## COMING SOON

We are currently working on a new major release of our Power\*Log and Power\*Curve software. Along with many other features, **Version 3.0** will feature:

- **Y2K compliance**
- **The ability to import directional surveys**
- **TVD presentation**
- **Amalgamation of reports**

Since Version 3.0 is currently under development, if there are any features or improvements you would like to see incorporated, please contact us. In the meantime, watch for more information from us as the new version progresses.

## SPRING SAVINGS

So is there a module of our software that you currently don't have, but would like? If so, now is the time to get yours because until May 31<sup>st</sup>, we are offering all our program modules at **25% off** to our existing customers. Choose from the following:

- Power\*Curve 1.92B Regular \$1799, **now \$1349**
- Correlational Module Regular \$2299, **now \$1725**
- LAS Import Module Regular \$399, **now \$299**
- LAS Export Module Regular \$399, **now \$299**
- Logo Module Regular \$199, **now \$149**

For more information about these modules, contact our office at (403) 777-9454 or via email at [info@trivision.ca](mailto:info@trivision.ca).

## FILE VIEWER

If you have been looking for a way to share your Power\*Log or Power\*Curve data with those who don't have our software, try the Adobe Writer. With this software, you can print any log or report to an electronic file that can be emailed or saved on a floppy disk. This file is then viewable (using a free viewer) and printable by anyone you send it to. Contact us for further information or visit our site for links to get the Writer and Reader.

## CSPG SHOW

As you may or may not know, this year's CSPG Joint Convention is being held June 14-18 at the Telus Convention Centre. For those of you planning to go, to the show, make sure you visit us in booth E9. We will have the latest versions of the software available for you to try out and some great prizes just for stopping by. See you there!

## CLIENT SURVEY

We'd like to thank everyone who completed our customer survey. The response was excellent and it gave us some great feedback to work with. If you haven't completed yours, feel free to visit our website and fill it out online. It only takes about two minutes and it helps us gauge what you think of our software and point out areas you may have concerns in.

I do, however have to point out some of the feedback from the survey. Of the responses we received:

- 100% felt that our software had met or exceeded their expectations.
- 100% would recommend our software to others
- 71% felt our software met or beat their price expectations.
- 100% felt that our software exceeded the competition in terms of features.

After looking at our customer survey results, it confirmed that our customers are our best form of advertising, so if you recommend our software to someone who purchases, we will gladly give you **\$100 as a 'thank you' from us**. It's as easy as that – no strings, just a way for us to let our customers know that we appreciate all they do for us.

## WHAT'S NEW ONLINE

As mentioned in the December newsletter, we have been hard at work in an effort to make our website more useful to our customers. Now when you visit, you can download the newest versions of Power\*Log or Power\*Curve, sign up for automatic notification of any updates or product information bulletins and check oil prices all at the same time.

To assist our users, the help desk is now online 24 hours a day and contains PDF versions of our online manual. If you don't have Adobe Reader, you can download it for free from our site. As well we have added a non-graphical version of the website for quicker loading and links to help you find any printer drivers you may need quickly and easily.

The site is there for you, so visit now and if you have any suggestions, please let us know and we'll do our best to accommodate you.
