

Alternate License Installation Procedure

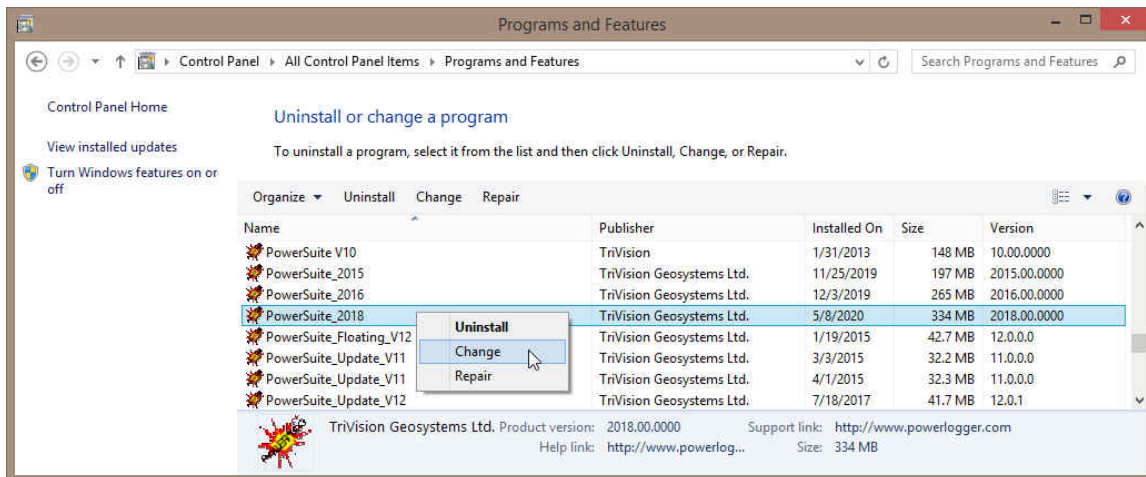

Hasp (USB) or QLM Authorization

Power*Suite 2018 already installed

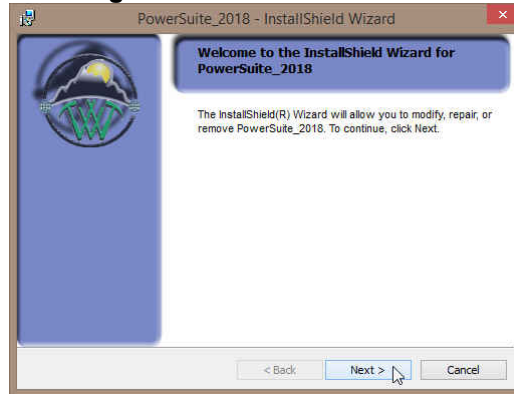

- 1.) The user must activate the **Control Panel**. It may be in the **Windows Start** menu or you may have to **search for the Control Panel** shown below.

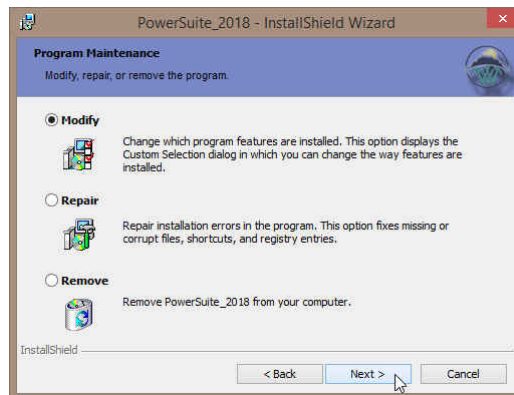

- 2.) **Click on the Programs and Feature Icon**. This will activate all the programs that have been installed on your computer.
- 3.) **Right Click on the PowerSuite_2018 and select Change** from the pop up menu.

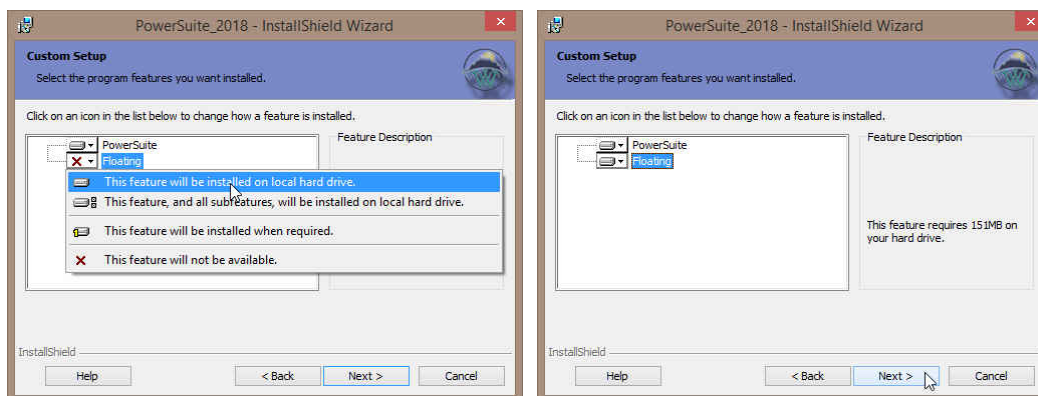

- 4.) This will activate the Install Shield setup followed by the Windows Install window and the **Power*Suite Welcome Message Window**. Click on the **Next >** button.

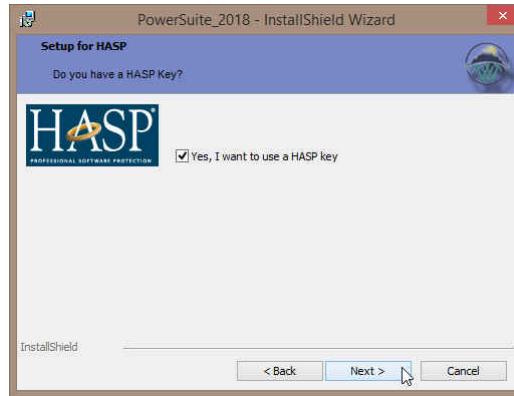

- 5.) This will activate the Program Maintenance window. Click on the  beside **Modify**. Then click on the **Next >** button. This will activate the Custom Setup window.

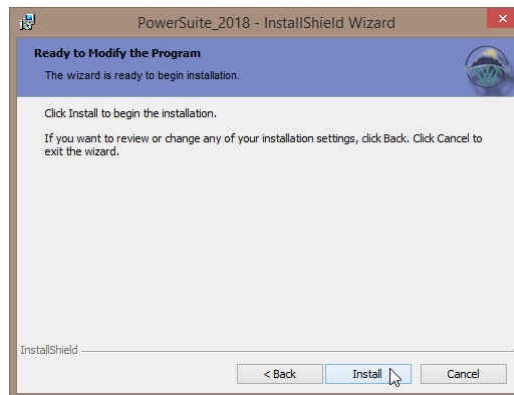

- 6.) Click on the **Floating drop arrow** and select **This feature will be installed on your local hard drive**. Click on **Next >** button.

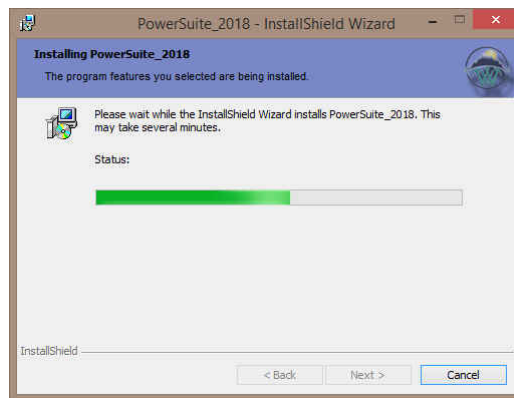

- 6) This will activate the Setup for Hasp Window. If you are using another USB Hasp key you will **Click** on the **Next >** button. If you are subscribing or renting you will **Uncheck** the Yes, I want to use a HASP key and then **Click** on the **Next >** button

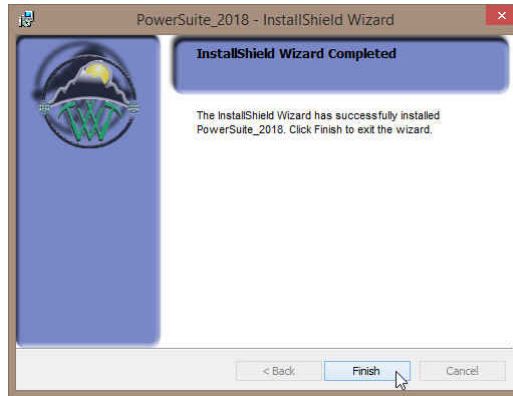

7.) This will activate the **Ready to Install** window. Click on the  **button.**

8.) Next the user will see the Installing **Power*Suite_2018** copying files, writing to the registry, creating desktop icons, creating start menu folder etc. An example of this window can be seen below.

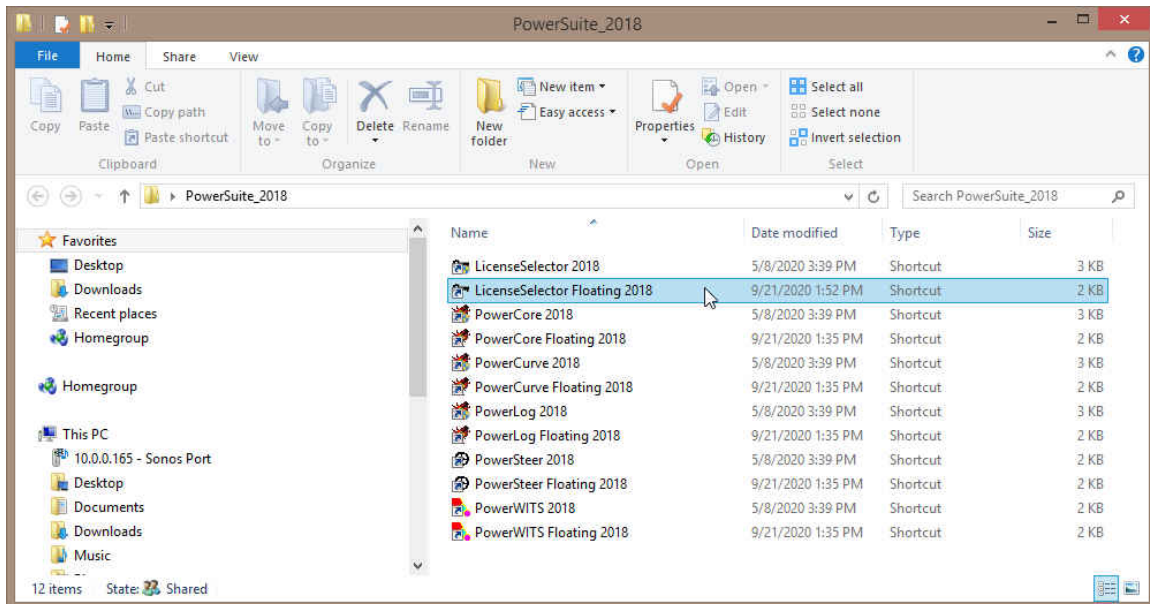

- 9.) Once the Update Installation is complete the **Install Wizard Completed** window shown below will be activated. **Click** on the **Finish** button for the Power*Suite 2016 Floating portion of this install.

You will now have successfully installed the Power*Suite Alternate Licensing which we installed as a Floating Icons to the Power*Suite_2018 desktop folder or in the Start menu in the floating folder inside the original install.

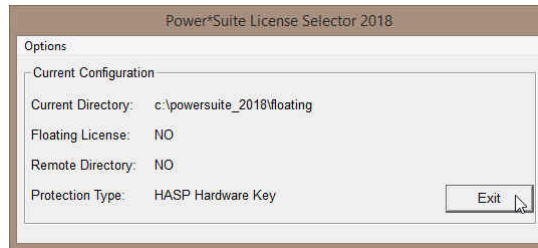

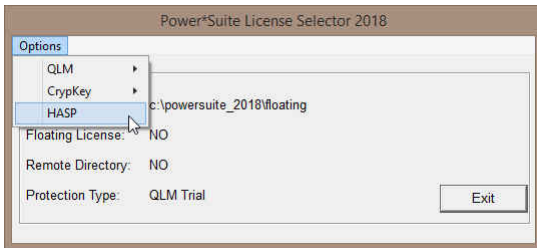

HASP Key Activation for the Alternate License Users

- 1.) Open your **PowerSuite_2018 desktop folder** and **select LicenseSelector Floating 2018** shortcut. This will activate the License Selector application.

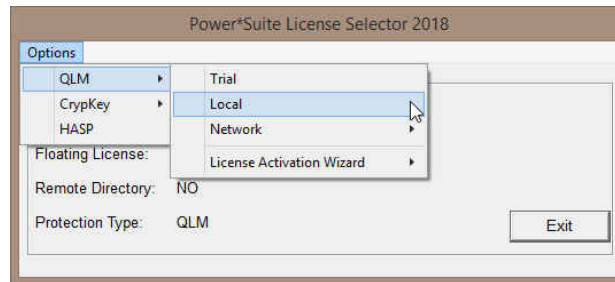

If you are subscribing then you will want to skip to Step 3. If you have a second USB Power*Suite Hasp key with our authorizations you will want to proceed with Step 2.

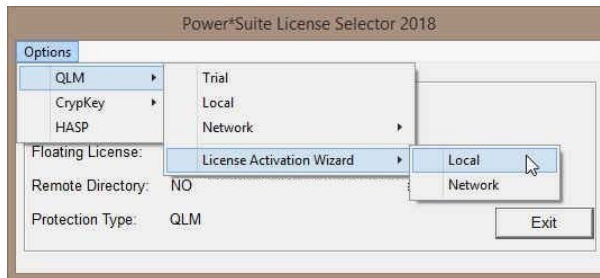

- 2.) **Click** on the **Options** menu item and **Select Hasp** from the Drop down menu as illustrated below and then **click** on the **Exit** button and plug in your second USB Power*Suite HASP Key.

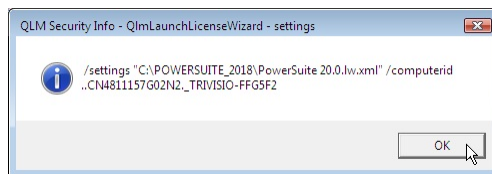

- 3.) **If you are subscribing Click** on the **Options** pull down menu and **Select QLM**, then **Select Local** as shown above.

- 4.) Then **Click** on the **Options** pull down menu and **Select QLM**, then **Select License Activation Wizard** and then **Select Local** as shown below.

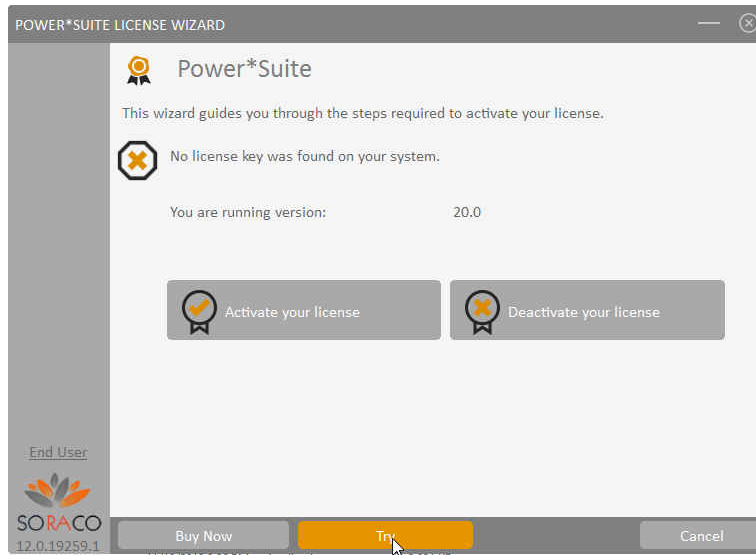

- 5.) This will activate a QLM Security Info window and **click** on the **OK** button.

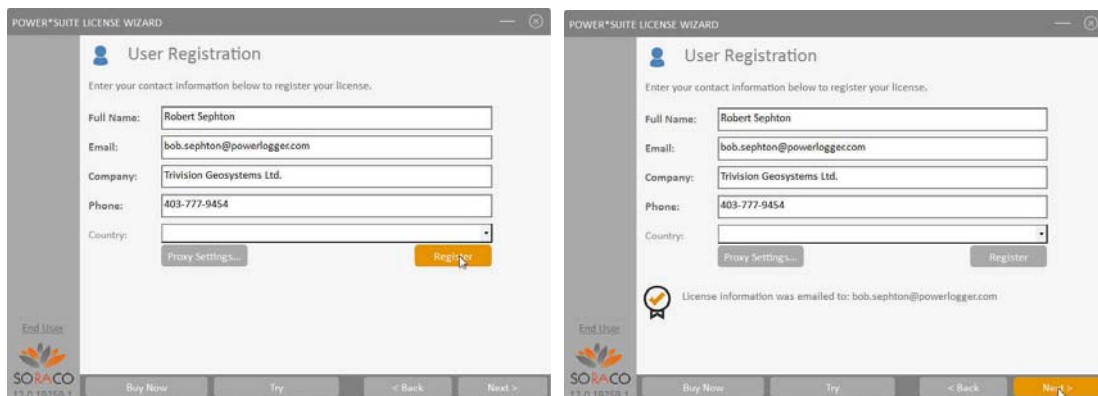

- 6.) This will activate a **User Account Control** asking you if you want to let the QLMLicenseWizard to run and **Click** on the **Yes** Button.

This will activate the Power*Suite License Wizard. **Click on the  button.**

- 7.) This will activate the User Registration window shown below. **Enter in your contact information** and remember you must fill in a legitimate email address as your Activation code will be emailed to you. The Country field is not a mandatory field. Then **click on the  button**

- 8.) This will activate a message within the User Registration window indicating that an email will be sent to you with your License activation. This window is shown on the above on the right. **Click on the  button.** This will activate the Activate Online message box with a empty Activation Key Field
- 9.) Check your emails. You should receive an email from Trivision Geosystems Ltd. This email should be sent within minutes. An example of our email is shown on the next page and you can then **write down or copy and paste the Activation Key** into the **Activation Key field.**
