Windows Version
 Windows 8

2.) Filled in the mandatory fields and **click on the button**. This will direct you to the download page.

Download: "Full Power*Suite"

- 3.) Click on the **Download: "Full Power*Suite"** verbiage. This will activate the download file **PS2018Setup.exe**.

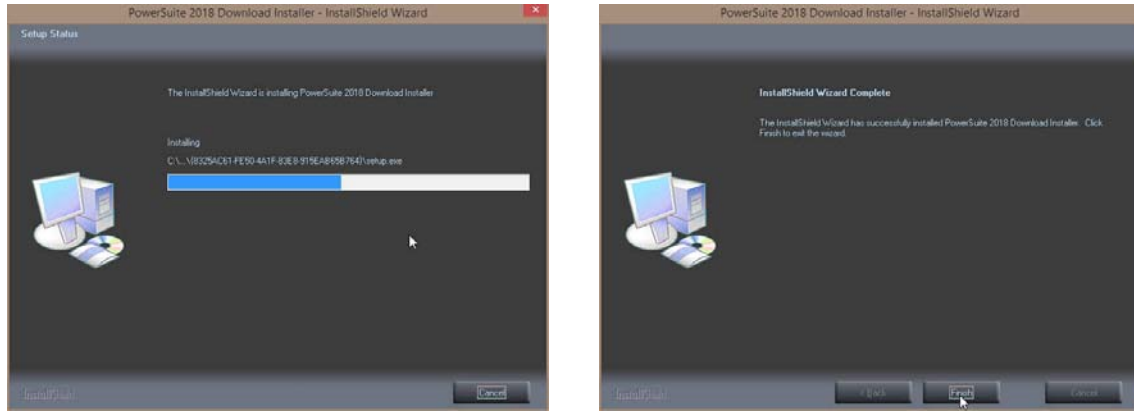

- 4.) Click on the **Save** button and the file will be saved to your downloads folder.
- 5.) Depending on your computer settings you may be asked to allow the application to Run. If you allow this down load to run this will activate the Power*Suite 2018 Download Installer shown below.

- 6.) Click on the **Next >** button to continue. This will activate the Ready to Install Window shown below.

- 7.) Click on the **Install** button to begin the process of extracting the files. When they have been extracted you will be prompted with the Finished Window.

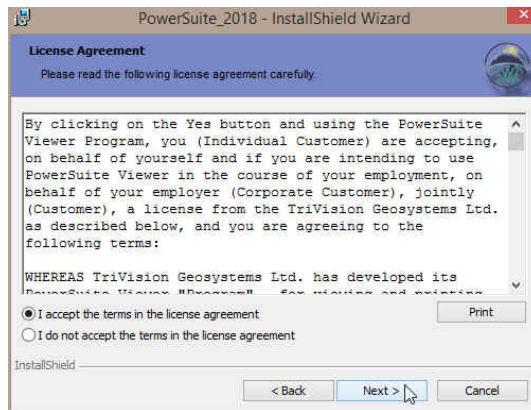

- 8.) When the files are finished extracting you will see the **Click**  **button**. This will begin the installation of Power*Suite 2018. If the installation does not proceed you will want to locate and run a file called **setup.exe** in the C:\PS2018SETUP\ folder.

Power*Suite Installation Procedure

- 1.) This will activate the Install Shield setup followed by the Windows Install window and the **Power*Suite Welcome Message Window**. **Click** on the  **button**.

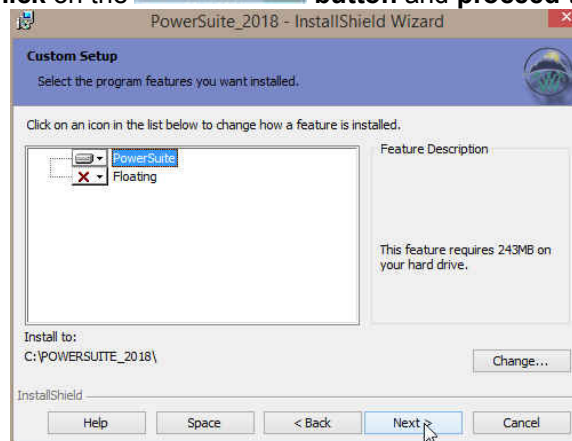

- 2.) This will activate the License Agreement window. **Click** on the beside **I accept the terms in the license agreement**. Then **click** on the  **button**.

- 3.) This will activate the Customer Information window with User Name and Organization fields. In the Install this application for portion of the window **Click** on the beside **Anyone who uses this computer**. Then **click** on the **Next >** button.

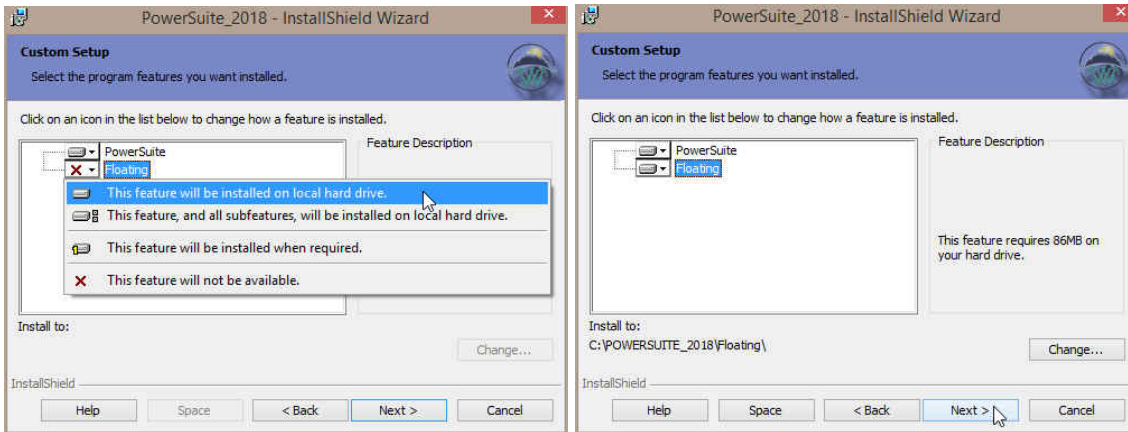

- 4.) a.) This will activate the **Custom Setup** window with the Floating not activated. If you do not need to **utilize a second type of Power*Suite licensing 4. b)** or **change the Install folder proceed to 4. c)**. **Click** on the **Next >** button and **proceed to step 5**.

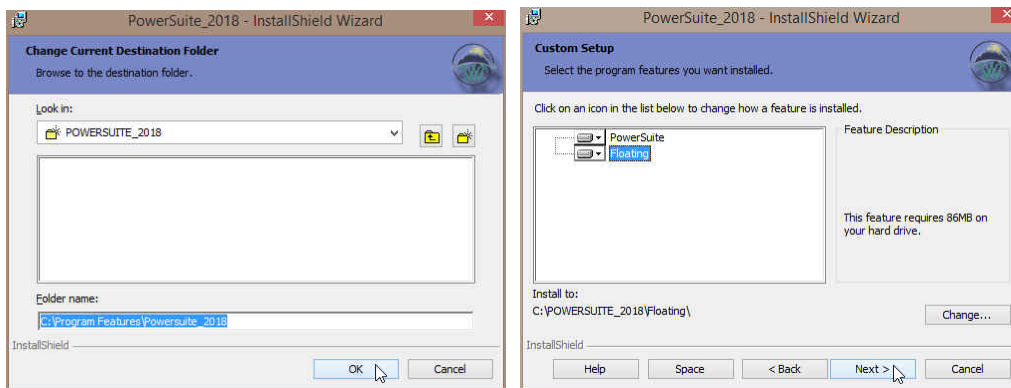

- 4) b.) If you do need to **utilize a second type of Power*Suite licensing** then you will want to **click** on the **Floating Option** and select the Floating Option otherwise **Click** on the **Next >** button.

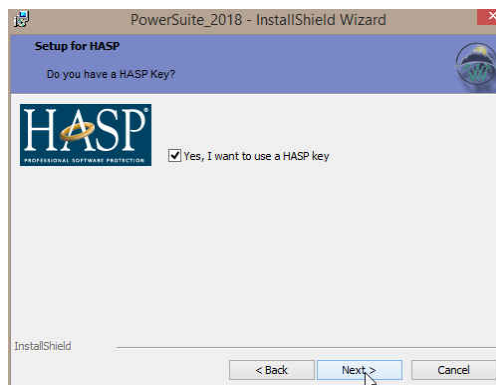

The floating folder allows the user to have three licensing types available. This could be a Subscription License (QLM), a HASP key activation for Power*Log and a QLM or another HASP key activation for Power*Curve.

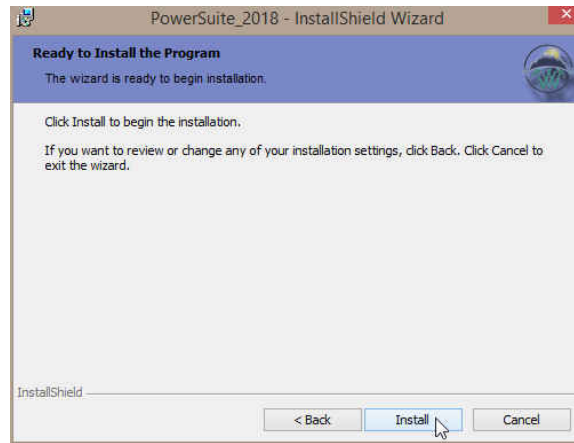

- 4) c.) The user can also change the install folder. To change the install folder **click** on the **Change...** button. This will activate a **Change Current Destination window** The Default installation folder location window with **C:\PowerSuite_2018** and you can create a new folder by **clicking** on the  icon and **typing in a path and folder name** in the appropriate field **or** navigate to an existing folder by **clicking** on the  icon. Then **click** on the **OK** button. This will put you back into the Custom Setup window.

- 5) **Click** on the **Next >** button.
- 6) This will activate the Setup for Hasp Window. If you have a Hasp USB key and it has been or will be activated for Power*Suite 2018 **Click** on the **Next >** button. If you do not have a hasp key and you are evaluating or subscribing then **Uncheck** the Yes, I want to use a HASP key and then **Click** on the **Next >** button

7) This will activate the Ready to Install window. **Click on the  button.**

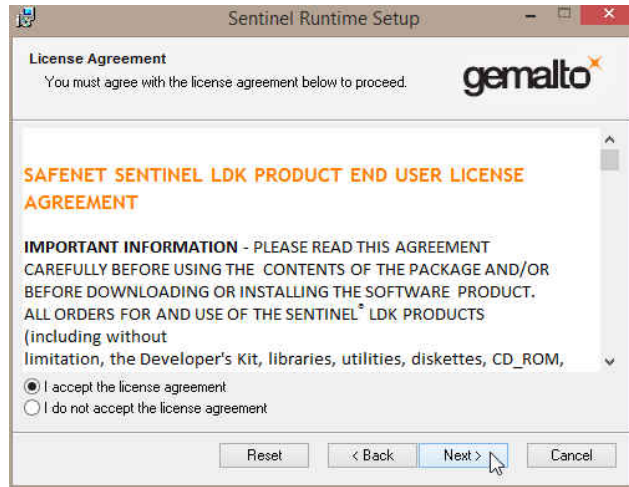

8) Next the user will see the Installing **Power*Suite window** copying files, writing to the registry, creating desktop icons, creating start menu folder, ODBC components etc. An example of this window can be seen below.

9) Once the Power*Suite Installation has been completed the Hasp Device Driver Installation Welcome window will be activated. **Click on the  button.**

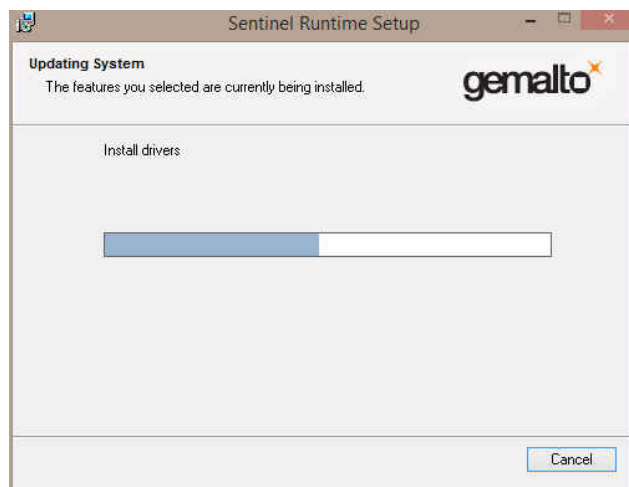

10) This will activate the End User License Agreement for the Hasp Driver. **Click** on the radio button  beside **I accept the license agreement**. Then **click** on the  button.

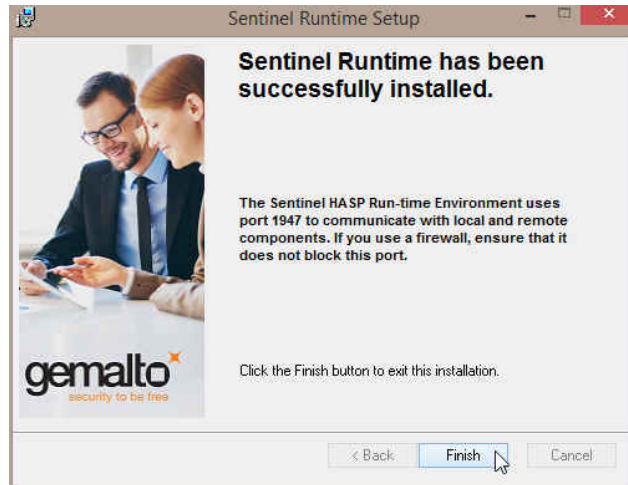

11) This will initiate the Ready to install window. **Click** on the  button.

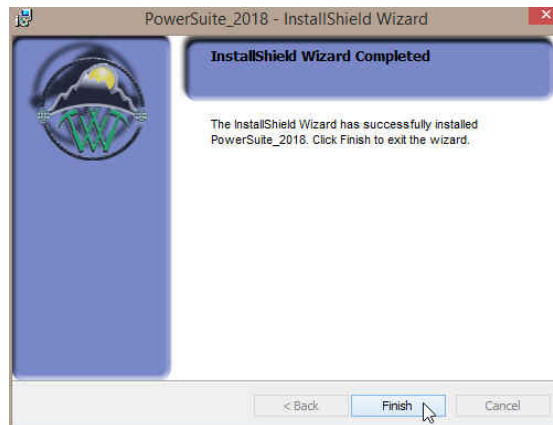

12) This will initiate the install windows for the HASP device drivers.

- 13) When the installation is complete the program will activate the Successfully Installed window. **Click** on the  **button**

- 14) Once the Update Installation is complete the **Install Wizard Completed** window shown below will be activated. **Click** on the  **button** for the Main install.

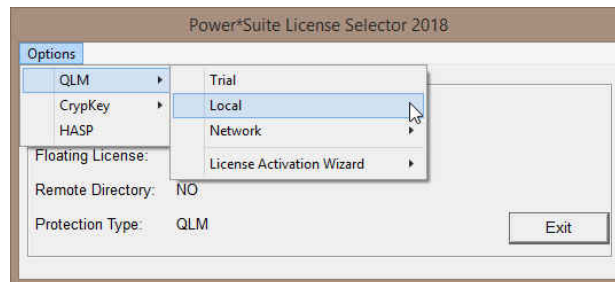

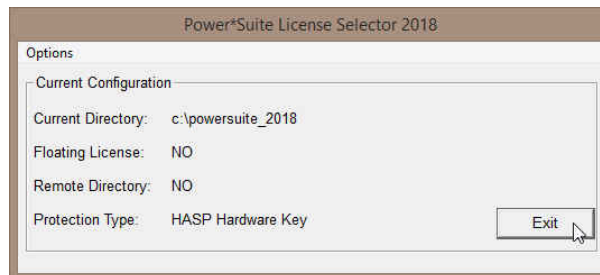

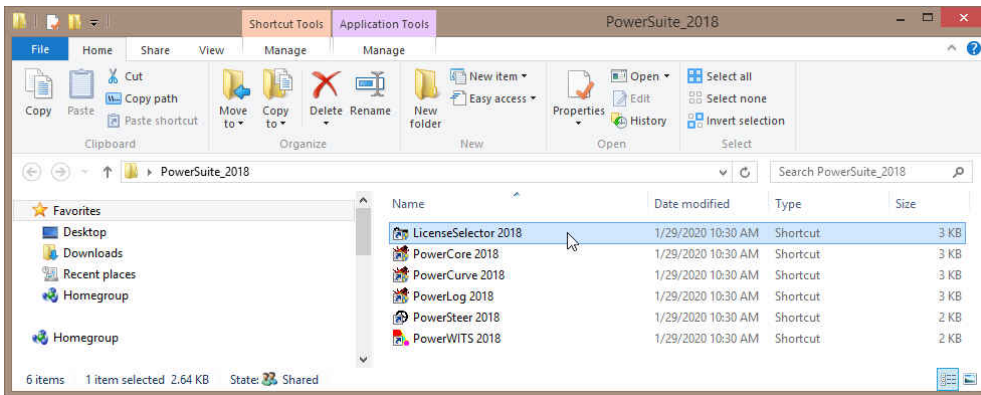

You will now have successfully installed Power*Suite and the Hasp driver.

Time License Activation

If you have a hasp key and you want to reactivate the Hasp key to the latest version skip to page 13.

The user will want to run our License Selector application (c:\Powersuite_2018\select.exe) which can be found in your Windows Explorer or click on the  button on the taskbar and Click on All Programs and Click on PowerSuite_2018, click on Utilities and then select the License Selector. This will activate the License Selector shown below. You may also select License Selector 2018 from the Desktop Power*Suite_2018 folder created during the install.

- 1.) **Click on the Options pull down menu and Select QLM, then Select Local as shown above.**
- 2.) **Then Click on the Options pull down menu and Select QLM, then Select License Activation Wizard and then Select Local as shown below.**

3.) This will activate a QLM Security Info window and **click** on the  **button**.

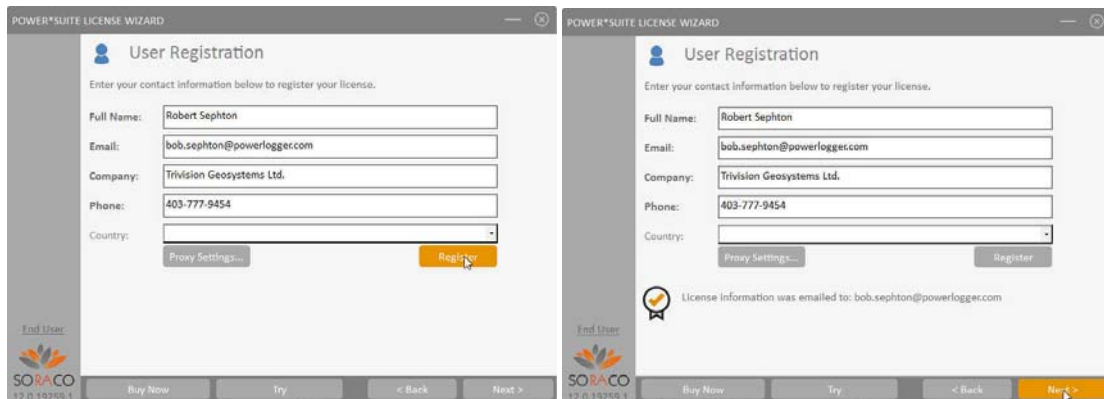

4.) This will activate a **User Account Control** asking you if you want to let the QLMLicenseWizard to run and **Click** on the  **Button**.

This will activate the Power*Suite License Wizard. **Click** on the  **button**.

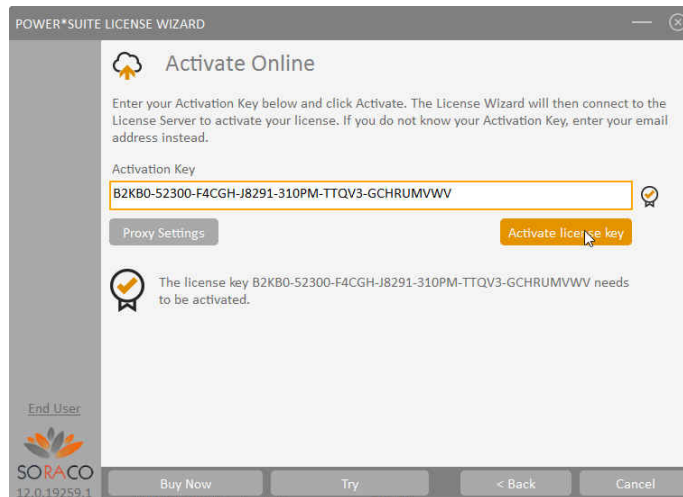

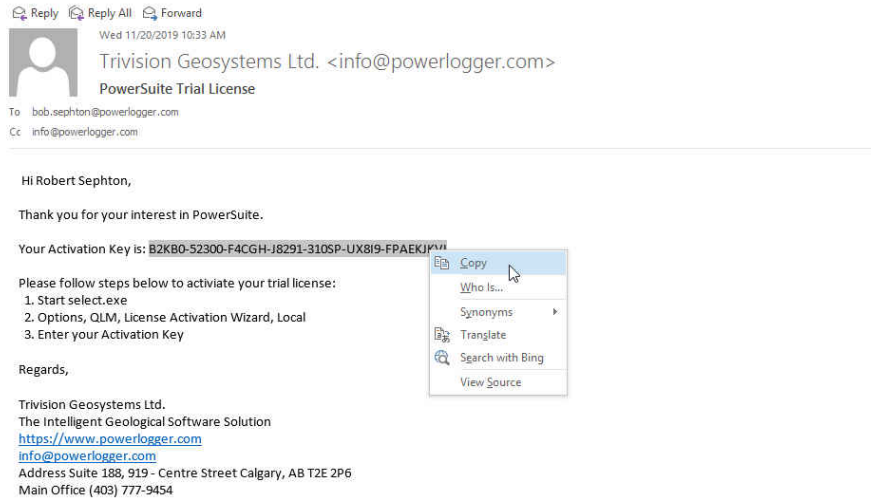

5.) This will activate the User Registration window shown below. **Enter** in your **contact information** and remember you must fill in a legitimate email address as your Activation code will be emailed to you. The Country field is not a mandatory field. Then **click** on the  **button**

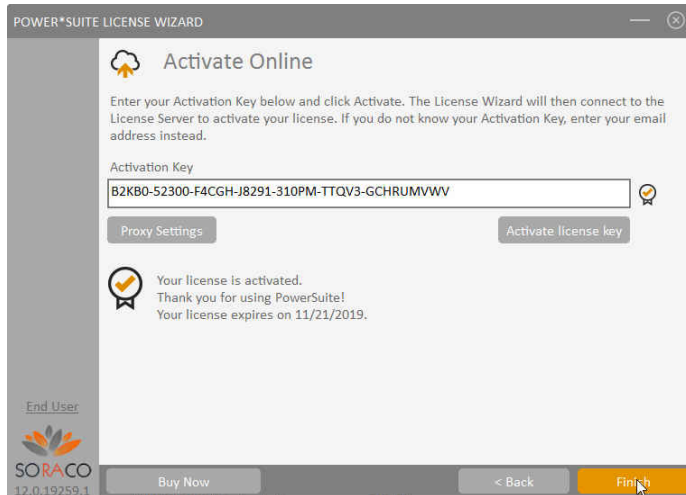

6.) This will activate a message within the User Registration window indicating that an email will be sent to you with your License activation. This window is shown on the above on the right. **Click** on the  **button**. This will activate the Activate Online message box with a empty Activation Key Field

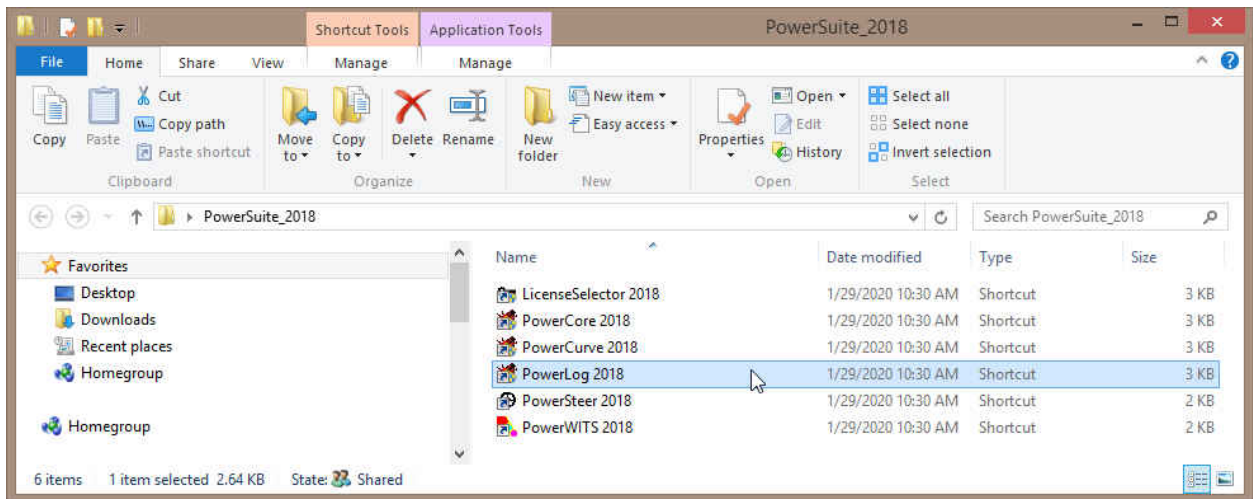

- 7.) Check your emails. You should receive an email from Trivision Geosystems Ltd. This email should be sent within minutes. An example of our email is shown on the next page and you can then **write down or copy and paste the Activation Key** into the **Activation Key field**.

- 8.) Click on the **Activate license key** button as shown above. This will activate a message within this dialogue indicating you have successfully initiated you trial license and the expiry date as shown below.

9.) Click on the **Finish** button.

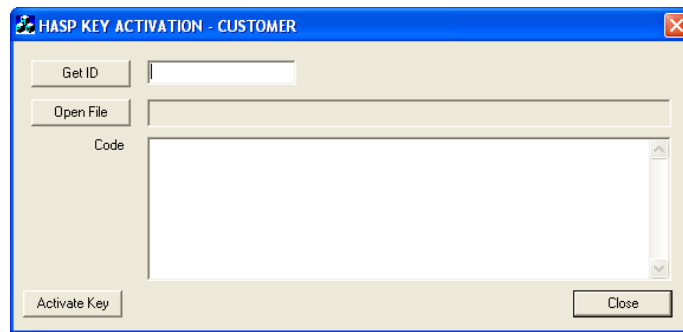

10.) You can now use all our Power*Suite Applications which are in the Desktop Folder created during the install. **Double click** on the **Power*Log** (Vertical Application), **Power*Curve** (Horizontal Application), **Power*Core** (Core Application), **Power*Steer** (Steering Application) or **Power*Wits** (Automated Import Utility) Desktop Icons to start using our Power*Suite applications.

HASP Key Log Upgrade Procedures

The following are the instructions on how to update your USB HASP key.

We have adapted our authorization from Version 3.0 onward with a Hasp Hardware Key. Once a Power*Suite program is loaded on a machine the user has simply to attach a Hasp Hardware key to the Parallel Port on their computer. The program is initially installed and protected by a software program. We have utilized a Software Authorization Program called QLM with Version 2018.

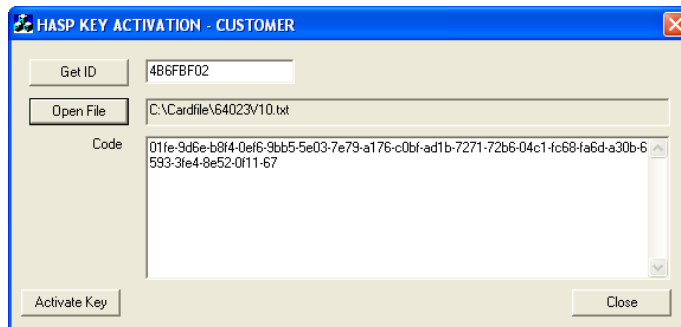

1. **If you have a Start menu, Click on the  button on the toolbar and click on All Programs and select POWER*SUITE_2018. Then select the Hasp Update Tool selection, and then click on the  HASP Log Update selection. This will activate the Hasp Key Activation window. Or in Windows 8 you will want to press the Windows key on your keypad and type Hasp Log Update and select it from your search.**

2. **Click on the  button. This will activate the open file window and locate the codes that were sent to you via email or other means. If you do not have email then you will have to fill in this Code field by hand.**

3. **Click on the  button and the codes will then be viewed in the activation window as shown below.**

4. Click on the **Activate Key** button. If done successful you will receive a system message as shown below. Or if unsuccessful you will receive a message such as tampering as shown below.

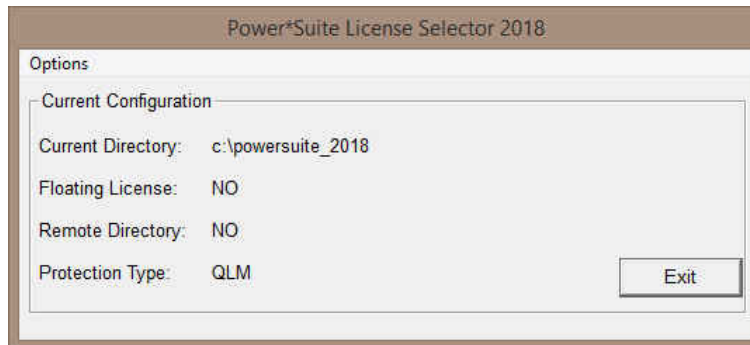

5. Click on the **OK** button and then click on the **Close** button to close the window.

Hasp (Hardware Key) License Activation

To activate a Hasp (hardware) key the user must first place the Hasp (parallel port) key on the parallel port before the printer cable. If you have a USB Hasp key this must be placed on the USB port. If you have not installed the Hasp key driver on your computer you must insert the Power*Suite CD-ROM and run the executable (**HASPUserSetup.exe**) to enable the program to see the Hasp key.

1. If you have a start menu click on the **start** button on the toolbar and click on **All Programs** and select **POWER*SUITE_2018**. Then, select **Utilities** and click on the **License Selector** selection as shown above. In **Windows 8** you can press the **Windows key** on the keypad and type **License Selector** into the search bar and then select the **License Selector** to activate the window.

2. Click on the **Options** selection to view the pull down menu.

3. **Select HASP**. The Protection type should read **HASP Hardware Key** as viewed in the Power*Suite License Selector window shown below.

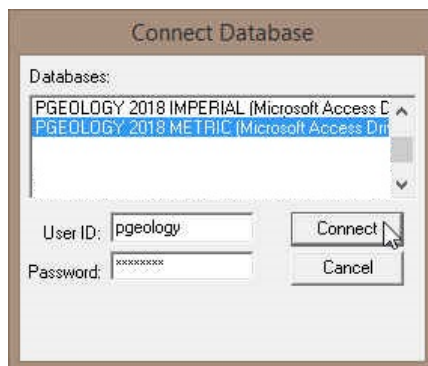

4. Click on the  button

You are now ready to run either Power*Log, Power*Curve, Power*Core or Power*Steer depending on your Hasp Key and its authorization.

Verify your USB Activation

- 1.) Double click on the  icon. Acknowledge the Security Information window by clicking on the  button. This will initiate the program and activate a **Connect Database** window.

- 2.) Highlight the **PGEOLGY 2018 Metric [Microsoft Access Driver(*.mdb)]** database and enter your **User ID** and **Password** in their respective fields (your default User ID and Passwords are both "pgeology").
- 3.) Click on the  button to complete the connection. The **New Log** window will be shown.
- 4.) Click on the  button.
- 5.) Select **Show Registration**, under the **Help** menu selection in Power*Log as shown below.

This will activate the Security Information window and show you the access flags on the USB key you just activated. The window is shown below. Yours should be similar to the one shown below.

Flags **3, 5 and 6** indicates 2018. Flags **3, 5 and 6** will run all Power*Suite applications from Version 6 to Version 2018.
